Artifact Analysis

Prediction: This is a...

Description	Material (What is it made of?)	Shape (Include details such as jagged or smooth edges, one side is curved while the other is squared, etc.)	Color (Include all colors on the object, even variations within the same color.)
	Texture (smooth, rough, bumpy, sharp, etc.)	Size and/or Weight (If you are analyzing a picture of an artifact, do you best to estimate size and weight.)	Condition and Age (Describe the overall condition and use it to estimate how old the object may be.)

Based on analysis, what do you think?	How and why was this artifact made?	How was this artifact used?

Still have questions?	I wonder…	Where can I find the answer?	I learned…

Summarize: Based on the evidence obtained from this artifact, what information does it provide about the people who made it and used it?
